# 100% Organic Coconut Coir for Indoor/Outdoor Agriculture Purpose

# Chairman Message

**Dr. Rashid Abdulla Al Haji**  
Chairman

We are undergoing a transformative time in our lives. Businesses and organizations are grappling with and the right solutions to increase their operational efficiencies in the new environment. R Capital General Trading is an opportunity to support consumers and businesses to reach their goals and objectives by offering quality products at wholesale rates.

R Capital General Trading was established in the year 2015 as a producer and an exporter of Coco Peat and many other related products from Sri Lanka and other Asian Countries to the International Horticulture industries. Today R Capital General Trading has become a market leader with its high-quality processing and production using the facilities in Sri Lanka and other Asian Countries.

Our export products are top quality in every aspect with a competitive price guaranteed. Our experienced team provides superior quality packaging materials and types of equipment to ensure the safety of the product from transit to delivery.

Warmest Regards,

## Management Team

R Capital General Trading is proud to have a team that has extensive experience in all areas of General Trading. As a general trading company which operates in a wide range of fields and focuses more on business investment than on the basic trading business.

We manufacture and distribute a huge variety of wholesale products for the best price in UAE and Asia. Our main goal is to strengthen our relationship with all customers by providing all high quality products. We have developed a reputation as a region's specialist in wholesale import and export of business and consumer products to clients across UAE.

**Sherif Mohamed**  
Director of Investment

**Mohamed Ziyath**  
Director of Supply Chain Logistics

# About Us

At 'R Capital General Trading', we specialize in commercial, industrial, and institutional construction projects, which sets us apart and makes us an impressive choice. We offer a comprehensive range of services, from design to project management and construction, making them a top choice for any construction needs.

Our team consists of highly skilled individuals dedicated to providing exceptional service. We are committed to meeting our client's unique needs with precision and diligence. Our contributions have been diverse, ranging from projects in office buildings, schools, sports facilities, hospitals, industrial facilities, and retail centers.

Our commitment to excellence has left a lasting impression on everyone, and we take pride in our unwavering dedication.

## Our Vision

Our goal is to become the top construction company in the region, recognized for our dedication to delivering exceptional results, prioritizing safety, and providing outstanding customer service.

## Our Mission

Our unwavering commitment is to provide unparalleled construction services for every project. We place safety, professionalism, and affordability at the forefront of our priorities.

# PLANT FIBRE HORSE BEDDING

Plant fibre bedding is a very environmentally friendly and stay fresh for a long time. The pH value is low which means that it is gentle on the horse's hooves and, thus, reduces the risk of thrush, just like it helps to bind ammonia odour. This leads to an improved stable climate without dust and odour nuisances. The bedding makes it a great choice for horses with respiratory challenges such as heaves or inflammatory airway disease.

Plant fibre can be used together with all other types of bedding – in the bottom of a straw box, topped with wood pellets or wood shavings, adding a brighter look to the box.

## Specification

- High EC
- Each Bale Quantity: 25 KG
- Loading Bales : 675

# COCOPEAT

Cocopeat, also known as coir pith, coir dust, or simply coir, is made from coconut husks, which are byproducts of other industries that use coconuts.

Coco peat serves as potting soil and a completely soil-free growing medium, making it an excellent choice for cultivating flowers and vegetables and improving soil quality. It's particularly well-suited for seed nurseries, hydroponic growing, mushroom farming, golf course construction, and landscaping.

Coir waste from coir fibre industries is washed, heat-treated, screened and graded before being processed into coco peat products of various granularity and denseness, which are then utilized for horticultural and agricultural applications and as industrial absorbents. It's usually shipped in the form of compressed bales, briquettes, slabs, or discs, which the end-user then expands and aerates with the addition of water. A single kilogram of coco peat will expand to 15 litres of moist coco peat.

We produce our Cocopeat and deliver it directly to our clients. R Capital General Trading and the Client engage in direct communication without involving any brokers or agents in the process. Rest assured that our pricing is very competitive, and our customers always receive a fair price.

## Coconut Fibre

Coco peat is a growing medium and is commonly used for soil amendments. It's made from the husks of coconuts. It's a beneficial product for plant growers and provides an alternative growing medium. It's used much like sphagnum peat in garden applications. It increases water retention, aeration and provides antifungal benefits when used alone or incorporated into the soil as an ingredient.

### How to Use Coco Peat In Garden

Coco peat can be directly incorporated into the garden soil to improve water retention, aeration and decrease the risk of the soil fungus and root diseases. Mix in the soil at a 25/75 ratio. It can also be used as a mulch around garden plants to help the soil retain moisture and prevent weed growth.

# COCONUT FIBRE CHIPS

- 100% chips
- Low ( EC <0.5 stable ) 4.5kg
- 10-20mm (particle )

Coconut fibre is a natural fibre extracted from the coconut's husk that is robust and durable enough to be used in a variety of products. This fibre is ideal for use as a potting medium for seedlings and plants.

## Coco Peat 5 Kg Block

The coco peat is washed, dried and pressed into 5kg blocks. A 5 kg of coco peat block can absorb more than 75 litres of water. Coco peat is used as potting soil and also as a 100% soilless growing medium. It is the perfect medium for growing flowers and vegetables and improving soil. Coco peat is ideal for nursery seeding, mushroom growing, hydroponic growing, golf course construction and landscaping.

### We offer

- Low EC(Electrical Conductivity) Coco peat blocks
- High EC(Electrical Conductivity) Coco peat blocks

## Low EC Coco Peat Blocks

- Potting mix suppliers
- Nursery & Garden center professionals
- Seedling Nurseries
- Lawn and Golf course constructors
- Horticulture and Floriculture applications
- Home Gardening and for landscaping use

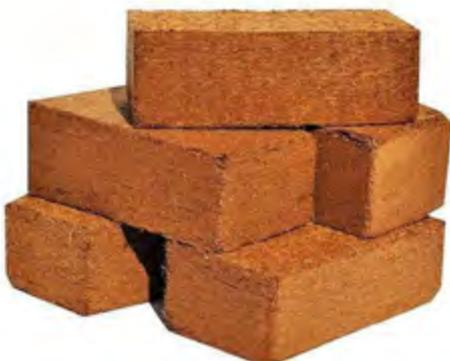

## Specification

EC	Low EC / EC < 0.5mS/cm
pH	5.5 to 6.8
Fibre Content	< 2%
Block Dimension	30x30x12 cms
Weight	5 Kg (11 Lbs)
Moisture	10% to 15%
Compression Ratio	5:1
Dehydrated Yield	75 Liters
Packing	Palletized-Stretch, Wrapped / Non-Palletized bare block loading
Load Ability	Palletized - 23 MT/ 40' HC non-Palletized - 26 MT/ 40' HC

## High EC Coco Peat Blocks

High EC coco peat is used as bedding in animal farms. Coco animal bedding is ideal as bedding for as floor layer for animal sheds due to its moisture-absorbing quality and soft bed cushioning effects.

## Specification

EC	High EC / EC > 1 mS/cm
Fibre Content	< 2%
Block Dimension	30x30x12 cms
Weight	5 Kg
Moisture	10% to 15%
Compression Ratio	5:1
Packing	Palletized-Stretch, Wrapped / Non Palletized bare block, loading
Load Ability	Palletized - 23 MT/ 40' HC Non Palletized - 26 MT/ 40' HC

## Coir Grow Bags

We export best quality coco peat grow bags that are widely used in greenhouse cultivation. Grow bags help in the effective utilisation of space inside a greenhouse. The closed type of planter grow bags are ideal for planting clusters of plants and for mass cultivation in greenhouses.

### We offer two types of closed coco peat grow bags

- 100% Coco peat Grow Bags
- Coco chips mixed Grow Bags

The bags are ready to use with growing medium, water and nutrients added to ensure optimum growth of the plants. Coco peat grow bags are suitable for Tomatoes, cucumbers, Bell peppers, Strawberries, Cut flowers.

### Specification

#### Compression Dimension

100x18x4 cm

#### Expanded Dimension

100x18x16 cm

#### Unit weight

3 kg/slab

#### Packing

370 slab per pallet

#### 40' hc container loadability

7400 pcs

## Coco Peat 25kg Bales

Coco peat 25 kg bale is a 100% natural growing medium. This can be used in many applications such as farms, greenhouses, horticulture, hydroseed spraying, landscaping, seed germination and as a substitute for potting soil, bark compost. This can also be used in a golf course setting for soil conditioner and in the mushroom industry as a casing medium.

### Specification

Product	Coco peat 25 kg bale
Dimension	30x47x85 cms
Weight	25 kgs
Volume	200 liters
Loadability	630 bales per 40' HC container

## Coco 50 Litre Bag

A fantastic plant growth medium! Coco 50 litre bag loose form is a 100% organic substrate manufactured by us. During the production process, the quality is constantly monitored, offering you a high-quality product with a fine, uniform structure. Coco 50 litre bag medium is a pure product with a homogeneous structure, and it is buffered to prevent that the medium consumes the nutrients; instead, the nutrients are directly available to the plant. It is free from harmful viruses and soil diseases. Has complex water or air balance that provides the ideal conditions for growing plants. It can be re-used a number of times and makes an excellent potting mix.

### Specification

EC	EC < 0.5mS/cm Super washed
pH	5.5 to 6.8
Unit volume	50 liters
Moisture	10% to 15%
Expansion	70 Liters
Load Ability	1800 bags per 40' HC container

## Coco Chips 5kg Blocks

Coconut shells are cut into sizes of 1 cm to 3 cm. It contains high quality Peat with Fibers to absorb more water. It is used as Mulching Agent. The Coco chips are suitable for the plants which require more Air Fill Porosity. Ideal for plants like Orchids, Anthurium. Coco Chips are free from weeds, prevent insects and harmful fungi.

### Specification

EC	Low EC / EC < 0.5mS/cm
pH	5.5 to 6.8
Weight	5 Kg (11 Lbs)
Moisture	10% to 15%
Compression Ratio	5:1
Expansion	70 Liters
Load Ability	23 MT per 40' HC container

# R CEYLON TEA

## R Ceylon Tea - World's Finest Tea from Sri Lanka

Celebrated to be the finest in the world, the unique flavour, fragrance and freshness of Ceylon Tea set it apart from the rest. Represented by the Lion logo and the 'R Ceylon Tea' trademarks assuring that it's a quality product of Sri Lanka, Ceylon Tea is exclusively handpicked by expert tea pluckers and is mostly produced through orthodox and artisanal methods. It is also the freshest tea available globally, expertly packed within three weeks of harvesting to preserve freshness, flavour, and aroma. R Ceylon Tea is the first Ozone Friendly Tea in the world and does not use Methyl-Bromide during packaging and shipping.

These have been mastered over the years and infused with contemporary creativity and imagination to satisfy the most judicious aficionado.

Low-grown teas, at an elevation below 2000 feet, produce good colour and strength and are popularly drunk with milk. Mid-grown teas, grown between 2000 to 4000 feet, are rich in flavour with good colour. High-grown teas, from heights of 4000 feet and above are considered premium and exude beautiful golden liquor and an intense, powerful aroma. Some estates also produce silver tips that give very pale straw-coloured liquor, best-drunk plain.

Sri Lankan tea (known for generations as Ceylon Tea) carries behind it a heritage and success story like no other. A product that began as a diversification experiment in 1867, spanning just 19 acres of land, has today surpassed all geographical borders to satisfy 19% of global demand. Reputed for its signature taste and aroma, Sri Lanka has become the world's third-largest tea exporter to the world, the country's largest employer and has the distinction of supplying tea to the Olympic and Commonwealth Games. It is a great equalizer, demanding attention from the counter of the smallest eatery to the most exclusive tea bars in the world.

Tourists and export markets alike have access to famous unorthodox variants and health beverages from Sri Lanka, such as green tea, instant tea, bio tea and flavoured tea. With the development of Sri Lankan tea exports, Green Tea has acquired a commanding position in the global market. Currently, Sri Lanka exports green tea to more than 40 countries. The Major buyers are United Arab Emirates, Russian Federation and Jordan. With Sri Lanka's awe-inspiring status of being the number one manufacturer cum exporter of orthodox black tea, the tea export trade from Sri Lanka is simply at US\$ 1.5 billion.

R Ceylon Tea is also the cleanest tea in the world in terms of pesticide residues, a fact confirmed by the ISO Technical Committee. Sri Lanka was also the first to achieve the "Ozone Friendly Tea" label recognized under the Montreal Protocol Treaty and is the proud owner of the first Ethical Tea Brand of the World recognized by the United Nations Global Compact.

Far from being just a scenic wonder, the panoramic tea gardens of Sri Lanka provide a countless number of blends and single garden tea of premium value. Most are situated at elevations between 3,000 and 8,000 feet, which span the lush mountains of the central highlands and the fertile plains of the southern inland areas of the island. Sri Lankan tea possesses unique and specific characteristics of quality and taste attributed to geographical origin and unique manufacturing practices.

# ARECA PALM TREES

- 6000 x 4000 px
- 20 x 13.3 inches
- 50.8 x 33.9 cm
- 300dpi

Areca Palm Trees are a unique yet versatile crop that can thrive when planted and spaced correctly. A good rule of thumb is that Areca Palm Trees should be planted about 20 feet apart from each other. This ensures enough room for each individual Areca Palm Trees to thrive.

# KING COCONUT

- 6 Pcs in a box
- 1800 to 2200 Boxes per
- 40' Refer to container

King coconut is a variety of coconut native to Sri Lanka & India. King Coconut drink can be considered a highly sweet and good beverage, and this product are 100% natural. King coconut water is also used to improve metabolism and purify the urinary tract.

# FRESH COCONUT

- Well matured Coconuts
- 25 Pcs per bag
- Weigh 13.5 Kg and above
- 1800 Bags per 40' HC Container

Our fresh coconuts are nutritious, tasty, and free of contaminants. This coconut is antiviral, antifungal, antibacterial, and anti-parasitic, which kills harmful bacteria, viruses, fungi, and parasites.

# BRISTOL FIBER

Coir Bristol fibre is stronger but less flexible than flax and cotton because it has more lignin and less cellulose. Small threads make up the offered range. This product is relatively water resistant, and it is the only natural fibre that is resistant to saltwater damage.

# CLEANING BRUSHES

Our 100% Natural Coconut Coir fibre Cleaning products are the best for low-tox cleaning and creating a chemical-free environment with multipurpose use to wash dishes, pots, and pans. Our soft brush products are made of natural, non-toxic substances which clean all surfaces and materials.

# FRUITS, VEGETABLES & SPICES

Agriculture is synonymous with Sri Lanka, mainly due to ideal climate, soil conditions and as one of the most popular livelihoods.

Vegetable production plays a leading role in agriculture, and vegetables are an important part of a healthy diet.

Though people talk about subsistence vegetable farming or self-sufficiency in vegetable production, reliable information is not adequately available for decision-making. Therefore, this paper attempts to reveal the current status of the country's exports and imports of vegetables. In 2015, Sri Lanka earned 37.2 million US\$ from exporting vegetables

(HS 07 edible vegetables and certain roots and tubers), placing the country at 81st place in world exports. However, at present, the country's vegetable exports have come to 0.1% share of the world's exports. The country's most popular vegetable exports include chilli, gherkin, red onion, breadfruit, youngJack, moringa, pumpkin and bitter gourd. For decades, the Maldives (16%) have been at the forefront of the country's vegetable exports, while the United Arab Emirates

(15.1%) were the second largest buyer.

Tapioca, Green papaya, cucumber, Spinach, Cabbage, Kolikottu Banana, Passion fruit, Mangoes, Cinnamon, Cardamom, Cloves, etc

## GREEN HOUSE

**R-Capital selling complete setup of Greenhouses including Hardware and software system.**

### Good lighting, strong thermal insulation

- Scientific means, reasonable design, and assured materials
- Strong wind and snow resistance and long service life
- Suitable for a variety of regions and climates, saving materials

### Professional construction team

- Design, production, installation, maintenance company
- Own design, development, production and construction teams
- Diverse styles can be customized

# OUR INFRASTRUCTURE

# R Capital General Trading was established in 2015. We have Coco peat factory at UAE, SRI LANKA & INDIA.

Our infrastructure is our strength. We have a smooth and well-managed production facility that helps us respond to bulk orders. We are equipped with modern tools and equipment. We have a large number of de-husking equipment at our facility.

After de-husking, the husk is used to manufacture a large number of coir products. We have a 5kg block making machine, 650-gram briquette making machine and grow bag manufacturing machine. We also have an organised department to handle every stage of production such as washing, drying, screening, compaction and packaging.

# LET'S START A PROJECT

Give us a call or drop by anytime. We endeavour to answer all enquiries within 24 hours on business days. We will be happy to answer your questions.
